THE URBAN DIFFERENCE

Urban has been delivering premium electrical services across Sydney since 2010. Working with leading strata companies, hospitality venues, schools and general commercial industries, our innovative and reliable approach has cemented us as a trusted electrical partner.

Our focus on designing, installing and maintaining customised electrical outcomes ensures that our clients are provided with an exceptional result.

Urban's transparent and open communication with our clients from scoping of a project through to handover and ongoing maintenance guarantees we are always committed to our clients' objectives and the outcomes they are trying to achieve.

With a strong culture of learning and development, our teams across the business are continually improving and innovating on our approach and methodology to all industries. In what is an ever-evolving industry, Urban's goal is to stay at the forefront of technology to ensure we delight our clients and deliver a superior and effective result.

OUR EXPERTISE

With a core focus on schools, strata, hospitality and commercial sectors, Urban's capability to provide an extensive range of customised commercial electrical services ensures we are always delivering to meet our clients' requirements.

The intricate needs of our clients across these four sectors enables our team to be constantly evolving and broadening our electrical scope.

Urban's expertise and deliverables to our clients include:

-  Electrical
-  Telecommunications
-  Security
-  Audio Visual
-  HVAC
-  Energy Management & Automations

OUR SECTOR FOCUS

Schools

The education and school sectors have rapidly changed in the last decade. The needs of schools are forever evolving and as a result, it is critical that the supporting infrastructure delivers for the school's requirements. Urban's rich experience in these sectors allows us to cater for everchanging environments to ensure that the needs of students, teachers and general staff are able to fulfil their day to day in an effective, efficient and safe manner.

As a preferred electrical partner for schools across Sydney including Scots College, our expertise across this education sector includes the efficient setup of fibre optic and data cabling systems, network efficiency for onsite and offsite learning, an all-encompassing premises security solution, HVAC, AV requirements and an overarching telecommunications system.

Strata

With a strong understanding and knowledge of the strata sector and its communities, Urban work with Sydney's leading strata companies to deliver one off and ongoing electrical services. Given the magnitude and size of strata environments, we work with stakeholders to satisfy their safety and moral obligations.

With residents and their families being of large consideration, Urban work in both communal and private areas of a strata building to ensure serviceability and safety are delivered and upheld. From telecommunication systems, switchboard works and general power and light through to an extensive and state-of-the-art security and access control system, Urban work with all stakeholders within strata to guarantee a high quality, first-class service experience.

Hospitality

The hospitality industry is an ever-growing sector within Sydney's bustling multicultural landscape. The need for smart, well thought out connectivity is crucial to the success of any venue.

Urban's skilled team work with builders, architects, hoteliers and internal teams to understand the electrical requirements for the hospitality space and provide a customised solution to whatever the need may be. From a comprehensive internal telecommunications setup, including data and fibre cabling as well as clever voice systems through to a robust security structure, Urban is determined to provide owners, staff and their guests with a seamless and hassle-free experience.

Commercial

From medical suites and showrooms to offices and warehouse facilities, the electrical needs for businesses is far-reaching. In what can sometimes be a complex environment, Urban take the time to understand client requirements, invest in value engineering and provide a customised plan to ensure the objectives are met.

Whether it's utilising existing infrastructure or creating a completely new system, our highly experienced team ensure your project is well considered to guarantee delivery on time and within budget. From network and data cabling through to smart integrations of security and telecommunications, Urban's attentiveness and proficiency in our planning will ensure efficiencies whilst fulfilling all client requirements.
